

SHOP FITTING & BESPOKE JOINERY

Quality & detail are everything

Gentip Shop Fitting and Bespoke Joinery offers high quality interior fit-outs for all types of commercial situations from large high street multiples and small independent retailers to nightclubs, offices and school interiors.

Gentip Services Ltd undertakes projects for full refits incorporating premium quality joinery of a standardised design, required for repeat production. We also have the facility to manufacture specific items of joinery within our in house joinery workshop. Our highly skilled team of craftsmen can design anything to suit your needs from the initial planning to the finished product.

From our workshop we dispatch to site and then reassemble on the project, reducing the critical amount of project time spent on site and therefore causing less disruption to your business.

Keeping everything in-house enables us to keep costs down and make your project budgets go further. We are very price competitive.

Our shop fitting and bespoke joinery services include:

- **Bespoke joinery, supply only or supply and install**
- **Shop fitting system installation**
- **Refurbishment of existing retail stores**
- **Store extensions**
- **Expansion into new retail formats**
- **Windows & doors**
- **Gondolas**
- **Exhibition displays**
- **Cabinet making**
- **Structural alterations**
